New MEI CE Course on Starting a Home Hemodialysis Program

Madison, Wisconsin—The [nonprofit Medical Education Institute \(MEI\)](http://mei.org) has released [a new self-study CE course](#) for nurses on how to start a home hemodialysis program. Based on the manual [Implementing Hemodialysis in the Home](#) developed by the [International Society for Hemodialysis](#), the course is certified by the California Board of Registered Nursing and counts for 4.0 CE hours.

“In light of the new [Advancing American Kidney Health Initiative](#), MEI is very excited to offer this new CE resource that focuses specifically on home hemodialysis—an underutilized treatment option in the United States that has numerous advantages for both patients and clinics,” said MEI Executive Director, Dori Schatell, MS. *“The book and new course are designed to support healthcare teams worldwide to develop successful home HD programs in their regions or expand existing programs to better serve their patients.”*

About MEI: Founded in 1993, MEI is a national 501(c)(3) public charity dedicated to helping people with chronic disease learn to manage and improve their health. MEI fulfills its mission by conducting research, developing evidence-based education for consumers and health professionals, and advocating for patient-centered policies. MEI is funded through licensing of the [KDQOL-Complete](#) service, sales of the 6th edition [Core Curriculum for the Dialysis Technician](#) book and slides, sponsorships for our [Life Options](#), [Kidney School](#), and [Home Dialysis Central](#) websites, fee-for-service contracts, and donations. Contact us at (608) 833-8033 or make a tax-deductible contribution at www.mei.org.
