MEI Offers Dialysis Clinics a FREE Patient Fluid Management Poster

Madison, Wisconsin — The non-profit [Medical Education Institute \(MEI\)](http://Medical Education Institute (MEI)) is launching a new, **Fluid Management Poster** during National Kidney Month to help educate hemodialysis patients about how to feel their best.

[Dialysis clinics can download the FREE PDF](#) from the MEI store and take it to any print shop with an included permission letter. Many local and online print shops will print the poster at **24"x36"** for \$30 or less.

MEI Executive Director Dori Schatell, MS, would love to see the poster in every US dialysis clinic. *"We want to help people SEE how their symptoms during and after treatment relate to how much fluid they take in and how much has to be removed,"* says Schatell. *"Drinking less—and removing less—can improve patients' quality of life."* Share pictures of your posters on social media, with the hashtags #GoodFluidManagement #ShowYourPoster.

MEI also released a [new, animated video](#) during National Kidney Month to help people take steps to slow chronic kidney disease, and will soon debut an updated version of [My Life, My Dialysis Choice](#)—a FREE treatment matcher in English and Spanish to help people make a choice that best fits their lives. The new tool and book it is based on include **transplant** and **comfort care** (medical management without dialysis or transplant).
